

## Paris Metro Table

*“Je ne Regrette Rien” Oh, Edith Piaf if only you had owned Laura Spector’s Paris Metro cocktail table. Would there be more joy in your song?*

Laura Spector’s cast bronze Metro cocktail table is inspired by the highly organic, curvilinear style of Art Nouveau metal master Hector Guimard. With its graceful curves, clean lines and, for just a sparkle of glamour, beveled mirror top, the Metro table, is a timeless classic that can anchor any room in style – indoors or out.

Like all pieces from the new Laura Spector Collection the Paris Metro table, is made from molds taken from oriental bittersweet vines, then cast in bronze and re-imagined by the artist so that each piece is slightly unique. The Metro table is also available in aluminum in a variety of finishes including natural rustic, silver/gold leaf, copper patina and glossy white or black.
